

Scott Turbon Mixer Joins Forces with the Hayward Gordon Group

The Hayward Gordon Group is pleased to announce that it has combined with Scott Turbon Mixer. This follows Hayward Gordon's earlier acquisition of Sharpe Mixers in December 2014 and further strengthens and expands their offerings and technical capabilities within the sanitary markets. As part of the transaction, Bill Scott of Scott Turbon Mixer will join Hayward Gordon's senior management team and remain active in growing the business.

Based in Adelanto, California, Scott Turbon has a 35 year track record of providing efficient and technically sophisticated high shear stainless steel mixers and mixing systems for demanding applications in: pharmaceutical, chemical, food processing, beverage, dairy, cosmetic and personal care markets. Hayward Gordon intends to make significant investments in the operations of Scott Turbon Mixer's Adelanto factory and design center in order to expand its capacity and better serve customers with sanitary applications. Bill Scott commented on the transaction, *"We are proud of our heritage at Scott Turbon Mixer and we are excited about the next chapter in our evolution. This partnership brings better distribution for our world class mixer products, and will help us to expand our Representative network to better serve the varied needs of our customers."*

Commenting on the acquisition of Scott Turbon Mixer, both John Hayward, EVP of Hayward Gordon and Ed Rogers, VP/GM of Sharpe Mixers stated, *"The fit between the businesses is strong from both a product and market standpoint. Scott Turbon Mixer extends our range of mixers into high shear and high viscosity applications furthering our expansion in the US sanitary, pharmaceutical, chemical, and industrial markets, with a more complete product offering."*

Bill Dubé, CEO of Hayward Gordon, added *"We are delighted with the excellent synergies that will result from the combined entity. The product fit between Hayward Gordon, Scott Turbon Mixer and Sharpe Mixers is highly complementary and allows us to offer a broad range of mixers from 1/3 HP to 500 HP, making us a leader in mixing technology across a wide range of demanding applications. In addition, we believe we will be able to better serve and support our collective customers' needs*

through our continued investment in people and operational systems across the three businesses.”

Hayward Gordon, headquartered in Toronto, Ontario, Canada, designs, manufactures and distributes mixers, pumps, and engineered systems for challenging fluid handling applications in a range of industries including: industrial, chemical, mining and mineral processing, oil and gas, and water and wastewater treatment. A controlling interest in Hayward Gordon was acquired by Element Partners in 2013, and serves as the platform for acquiring pump and mixer manufacturers focused on sanitary and industrial process and other demanding fluid handling applications. Hayward Gordon was represented in this transaction by England & Company.
